

## Energy Management Services

### Providing **Knowledge**

Our Tenant Web-Dashboard gives you incredibly quick insight into your tenant's consumption.

---

### Promoting **Efficiency**

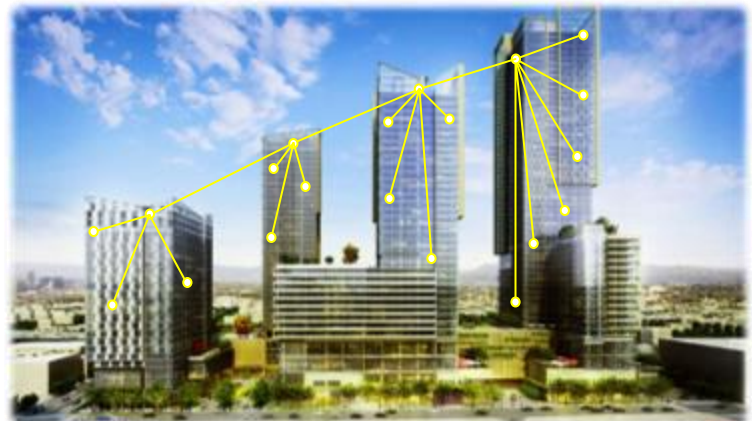

Providing benefits to both building owners and tenants through accurate reporting & billing while incentivizing conservation.

---

### Producing **Accessibility**

With remote anywhere access, you won't need to move from the comfort of your office to see your building's reports.

---

# The Eneractive Advantage

With four different service options, **Eneractive's Submetering Contracts** are guaranteed to deliver what you need!

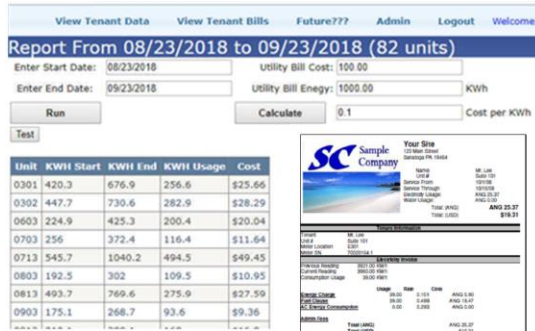

- A. Submetering System Maintenance:**  
Hassle free system maintenance to ensure your system is logging, storing, and reporting correctly.
- B. Eneractive Reporting Services:**  
Simply send us your utility bills each month, and we will generate your buildings reports and individual tenant bills. Available in both excel and PDF format.
- C. Eneractive Dashboard Suite:**  
With complete remote access, you can view all your system's data from anywhere in the world. Whether it's graphically analyzing usage or downloading reports, the Eneractive Dashboard Suite gives you all the tools.

## Reporting Services

Let Eneractive **fully automate** your submetering system with Eneractive Reporting Services:

- ✓ Simply forward your utility bill.
- ✓ Eneractive will download tenant data, and generate the summary report.
- ✓ Eneractive will create individual statements and send them, along with the summary report, back to the landlord, management company, or billing service provider.

## Submetering System Maintenance

Through our standard maintenance contract, Eneractive will:

- Provide **daily health reports** of your system including PC and meter communication.
- System **support** via phone, email, or remote access with one of our highly **qualified engineers**.
- **PC Maintenance** and upkeep.

## Dashboard Overview

The **Eneractive Tenant Dashboard** enhances the usability of a traditional submetering system with 4 key factors:

- Easier data storage through Cloud Integration.**
- Remote Access** through the web application giving you the ability to log in and monitor data at any time.
- Graphical Interface** giving the user an easier way to interpret data therefore enhancing **Efficiency**.
- Worry Free** extended system maintenance with annual contracts to keep your system up and running.
