

The Eneractive Advantage

Eneractive LLC has been at the forefront of **Energy Management Technology** since the 1990s. With our team of Energy System Engineers, we provide efficient metering and monitoring solutions for a diverse set of applications.

Project Types (2018)

The Breakdown

Submetering Systems:

- ✓ Installing our submetering software and network necessary to poll electric submeters to give the owner and/or billing company a better way to allocate electrical utility charges.

Power Management:

- ✓ Complete integration of HMI, SCADA, & monitoring systems from programming meters to developing graphically relevant display screens.

Meter Setup:

- ✓ Adding multiple meter types into one consolidated system for BAS / DDC integration.

Energy Web Dashboards:

- ✓ Developing and programming innovative web application dashboards to monitor energy usage, trends, and reports.

SCADA Solutions

Insight into your Power Distribution by Visualizing:

- Power Quality
- Trends
- Usage Reports
- Alarms & Events

Providing tools to meter, manage, and analyze data.

Metering Integration

Consolidate multiple metering systems into your pre-existing building management network.

Billing & Reporting Services

Fully Automate your sub-metering system.

Sub-Metering Software

Allocate your building's utilities for your tenants' **Actual** usage.
